OFFSHORE STACKER RELEASE

Lower downrigger approximately 10 to 15 feet. Attach snap and first clip to downrigger cable. Attach fishing line to second clip.

HELPFUL HINTS FOR THE CANNON OFFSHORE RELEASE

1. Place a piece of paper or plastic bag between the pads for long term storage. This prevents the pads from sticking together and pulling away from the clip.
2. Before each day's use, slide the clip sideways to break the surface tension of the rubber pads.
3. Special anti-fouling pins built into the Offshore Release prevent fishing line from getting behind pads, which could result in the release not working properly.
