UNI-LINE RELEASE

A universal one-hand tension release that "clicks" through a series of increasing tension settings. Can be used on any test line for salt or fresh water.

ADJUST PAD SPACING TO INCREASE RELEASE TENSION BY TURNING TENSION KNOB (+) FOR HEAVY OR (-) FOR LIGHT.

PLACE FISHING LINE BETWEEN PADS AND START CLOSING THE RELEASE.

EACH SUCCESSIVE "CLICK" INCREASES RELEASE PRESSURE ON LINE.

TO OPEN, SPREAD RELEASE ARMS.

OFFSHORE LINE RELEASE

For best results, attach snap directly to downrigger weight. Attach fishing line to clip at end of release.

HELPFUL HINTS FOR THE CANNON OFFSHORE RELEASE

- Place a piece of paper or plastic bag between the pads for long term storage. This prevents the pads from sticking together and pulling away from the clip.
- Before each day's use, slide the clip sideways to break the surface tension of the rubber pads.
- Special anti-fouling pins built into the Offshore Release prevent fishing line from getting behind pads, which could result in the release not working properly.
